

ABSTRACT OF THE DISCLOSURE

The movable personal computer using system is located inside the instrument panel of a motor vehicle. It has a PC holder comprising a supporting table on which a movable personal computer is set on, three
5 leaf springs to retain the computer at the predetermined position of the supporting table, and cams contacting to the supporting table and adjusting its height. The computer is connectable to the CAN of the motor vehicle. A front and back mirror member is arranged in a case to
10 cover the PC holder and the computer. A screen on the display of the computer is reflected by the mirror members toward a driver to see its virtual image.
